

## October Condition of Month

If you are looking for an effective alternative to "flu vaccines and medications", listed below are some items used to work with patients with flu symptoms (sore throat, coughing, runny nose, headache, aching muscles, fatigue, swollen lymph nodes, fever, head congestion, breathing difficulties, sneezing):

TOTAL VIRX & TOTAL MULTIMUNE - Take 2 tablets of each initially and then 1 per hour thereafter for the first day and then lower the dose. Flu symptoms are usually better in about 24 hours. Add C-1000-TR, one every 4 hours. If there is vomiting, add L-GLUTAMINE PLUS, 4 tablets initially and then 1 per hour. If there is bowel disturbance, add TOTAL PROBIOTICS, 1 capsule every 4 hours. Drink plenty of filtered water and rest.

FLUALGIA and VIREX (homeopathics) may be used also.  
(see back for indications and ingredients)

“Flu” Sale!!!

THROUGH OCTOBER 31 BUY 6 of the products listed
